

FS1 FAN SYSTEM

THE LEADING FAN ARRAY SYSTEM

Simply efficient.

THE leading brand in the custom, semi-custom, and commercial HVAC industry offering the simplest and most advanced fan systems built with our innovative technology, engineered to optimize design, installation, and operational efficiencies.

*"Before we had bearings to grease and belts to change but now, we just have 18 fans that run on their own."
- Maintenance Manager*

*"Q-PAC's system provided enough static pressure to meet LEED requirements all while having an 8 hour down time for the system."
- Building Manager*

*"Reduced energy cost by 45% and saved us \$80,000 in annual maintenance costs."
- Building Manager*

Electricity Demand

Lower power consumption using ECM fans

- Potential for energy rebate from local utility for retrofit to variable speed ECM fans
- Typical ROI energy cost 18-48 months pay back

System Installation & Maintenance

Zero maintenance system

- Hand carry all components through service elevator
- Retrofit fan system overnight with our plug and play kit
- Eliminate rigging and demolition

Redundant System

Inherent redundancy

- If one fan fails, the others can ramp up to make up the capacity
- 15 minutes to replace a failed fan

System Warranty

5-year parts warranty
